

This fairly simple code routine does show you how you can do a three column layout which includes built-in figures and also can include headers and footers that are left-right sensitive.

While there are several fine layout programs available today, such as *Ventura Publisher* and *PageMaker*, this text-only code shown here gives a very high quality result, is totally flexible, device independent, fast, and economical.

More importantly, you can easily switch in to or out of PostScript anytime, so there is no practical limit to what goes where on the page.
