

A first undefined **error involving** woof **was found.**

stack:
(A stack marker in case it is empty)

This is a a simple message.

The next "regular" text follows, but don't forget a between-text space! Should the next "regular" text be long, a newline will be forced. Use the Gonzo Utilities if you want better linebreaks or otherwise superb results.

Here is how you change a font and back again.

Newline characters of "\n" can be added when and where wanted.

Newpage characters of "\f" can be added when and where wanted.

The "==" command presently includes...

```
**begin**  
1234  
(A dreported string)  
123.456  
/a_nice_name  
*null*  
"[" or "mark"  
true  
*dict* 3 long with /bowwow  
[  
  (an array string)  
  true  
  1.4  
  5678  
]  
{  
  (an array string)  
  /true  
  1.4  
  5678  
}
```

A stack dumping demo...

```
stack:  
  (an array string)  
  true  
  1.4  
  5678
```
